

## Series 0213 V-shaped Snow Shovel

### I. Picture

### II. Main parameters of product:

Technical Parameters of V-shaped Snow Shovel		
Model	021372	021384
Total width (mm)	1830	2130
Total Height (mm)	780	780
Total length (mm)	945	945
Swing angle of shovel (°)	±30	±30
Width upon bevel at 30° gradient (mm)	1600	1870
Width of front part of V-shaped shovel (mm)	1480	1760
Width of reverse V-shaped shovel (mm)	1720	1975
Height for avoiding obstacle (mm)	• 90	• 90
Weight (including hanging parts) (Kg)	405	425

Hanging and installing model	Skip steer loader	Skip steer loader
------------------------------	-------------------	-------------------

## II. Main features of the product

1. Equipped with a double-acting hydraulic cylinder controlled by a solenoid valve; each shovel plate can move independently.
2. Reinforced steel structure and replaceable bottom wear-resistant edge plate. The edges of the shovel are connected to the shovel with bolts, which is convenient and efficient. A nylon edge plate is also available.
3. Automatic turn-over design for avoiding obstacles. It will automatically turn over when obstacles are encountered, to ensure no damage to the machine parts. After the obstacle has been passed, the shovel plate will automatically return under the action of the spring.
4. Capable of being transformed into various forms according to need, suitable for working on roads of different widths.  
Also capable of swinging left and right, with better clearing effect and obstacle avoidance, suitable for snow removal from all kinds of roads.

Note: HCN products are constantly updated and improved for users. Rights to change the parameters and design are reserved without notifying the users in advance. In case of possible appearance and color differences between the products shown in the pictures and the actual products, the actual one shall prevail.
