III. Main characteristics of product

Applicable to a skip steer loader or a mini-loader for tree pruning operations.

Through the stretching and contraction of the hydraulic cylinder, the scissor is driven to close or open, with stable

and powerful motion as well as safe and reliable operation, greatly reducing the labor intensity of the operation personnel.

Equipped with a clamping mechanism, ensuring reliable and convenient operation.

If it is equipped on a small loader, the client shall independently install the position limiter for bucket tilt-back and the skip bucket as per the condition of the main equipment.
