

Series Mini Bevel Sweeper

I. Picture:

II. Main technical parameters of product:

Technical Parameters of Mini Bevel Sweeper	
Model	MINI020140
Total length (mm)	1000
Total width (mm)	1310
Total height (mm)	540
Total weight (including hanging parts) (Kg)	150
Sweeping width (mm)	1000
Swing angle (°)	±30
Sweeping width after the swing of 30° (mm)	870
Brush roller diameter (mm)	• 500
Maximum allowable pressure (Mpa)	20
Operating flow (L/Min)	30~40
Hanging and installing model	Mini slip

III. Main characteristics of product

1. Capable of removing snow from places including street edges and corners quickly; characterized by convenient mounting, flexible use, high work efficiency, reliable quality, and superior performance.

2. With polypropylene and steel wire mixed brush roller, mainly used for removing natural loose snow, with the advantages of wear resistance, high elasticity, and bending resistance without causing damage to the road surface.

3. Capable of swinging from left to right within 30° for snow removal to change the sweeping direction.

4. Hydraulic motor direct-drive roller brush design, capable of meeting the maximum power requirements for snow removal.

Note: HCN products are constantly updated and improved for users. Rights to change the parameters and design are reserved without notifying the users in advance. In case of possible appearance and color differences between the products shown in the pictures and the actual products, the actual one shall prevail.
