

Series PLZ Hydraulic Power Station

I. Picture:

II. Main technical parameters of product:

Technical parameters of series PLZ hydraulic power station		
Model	PLZ40	PLZ55
Total length (mm)	1290	1545
Total width (mm)	1010	1520
Total Height (mm)	1540	1560
Weight (kg)	900	1100
Engine power (kW)	40	57
Hydraulic oil volume (L)	125	200
Flow rate (L/min)	80-120	80-120
Rated pressure (MPa)	16	16
Voltage (V)	DC24	DC24
Applicable main engine (payload mass)	Trucks of 1t and above	

III. Main characteristics of product

The hydraulic power station provides the hydraulic power for the hydraulic system and is characterized by high work

efficiency, small volume, strong power, and so on. It offers a convenient and reliable power source in operations such as municipal curing of highways and snow and ice removal.

1. In coordination with the bevel angle sweeper, the snow accumulated on the pavement will be removed rapidly from expressways, airports, highways, and so on.

2. The large-volume hydraulic fuel tank and efficient cooling system enable continuous operation of the machine for a long time.

3. The rust-proof, unique oil filtration system prolongs its service life.

4. Set with oil-level observation holes, the large-power heat dissipation device has a good heat dissipation effect and monitors the height of the hydraulic oil at any time.

5. Equipped with a cooling system, filtration system, rotation speed display, pressure and temperature indicators, valve control, and other devices, it can better serve the hydraulic system.

6. The mechanism is compact with a small volume and convenient transport.

Note: HCN products are constantly updated and improved for users. Rights to change the parameters and design are reserved without notifying the users in advance. In case of possible appearance and color differences between the products shown in the pictures and the actual products, the actual one shall prevail.
